Professional Summary

Highly motivated Junior Backend Developer with a solid foundation in Python and Django. Experienced in building robust, clean RESTful APIs, automating tasks via asynchronous Telegram bots, and managing relational databases. Proficient in Linux systems (Arch/Fedora) and deploying scalable applications using Docker, Nginx, and modern cloud infrastructures.

Technical Skills

Category	Technologies & Skills
Backend Development	Python, Django, Django REST Framework (DRF)
Databases	PostgreSQL, MySQL, MariaDB
DevOps & OS	Linux (Arch / Fedora), Docker, Nginx, Gunicorn, Railway, DigitalOcean
Automation & Tools	Aiogram, Telethon, Git
Frontend & Other	HTML, CSS, JavaScript, Penetration Testing (Hobby)

Projects & Deployment

Online School System (ERP)

Technologies: Django, DRF, PostgreSQL

- Designed and developed a comprehensive Enterprise Resource Planning (ERP) API for educational institutions.
- Created complex relational database schemas to manage student enrollment, attendance tracking, and grading systems.
- Implemented role-based access control (RBAC) to secure administrative, teacher, and student endpoints.

Finance Manager API

Technologies: Python, Django, DRF, PostgreSQL

- Built a robust personal finance tracking API to manage budgets, categorize incomes, and track expenses.
- Integrated JWT-based authentication and structured RESTful endpoints for secure, user-specific data isolation.
- Optimized database queries using Django ORM indexing and query optimization techniques to reduce response times.

IslamDaily Bot

Technologies: Python, Aiogram, MySQL, Redis, Railway

- Developed an asynchronous Telegram bot for daily Islamic reminders, content scheduling, and interactive user queries.
- Handled concurrent user requests efficiently using the Aiogram framework and designed a persistent PostgreSQL database layer.
- Containerized the application with Docker and configured automated deployment pipelines via Railway.

Salmoncs.com (Personal Portfolio)

Technologies: Nginx, DigitalOcean

- Built and deployed a personal portfolio website to showcase active projects, technical skills, and contact information.
- Configured Nginx as a reverse proxy with Let's Encrypt SSL certificates for secure HTTPS connections.
- Self-hosted the application on a DigitalOcean VPS, managing the deployment environment manually via Linux terminal.

Education

Bachelor in Marketing Tashkent State University of Economics (TSUE)	2024 - Present Tashkent
Backend (Python / Django) Najot Ta'lim IT Academy	Graduated Tashkent
